BULGARIA and GREECE are divided into counties and departments, respectively. Because of the scale no attempt has been made to delimit and name these subdivisions; their administrative centers have, however, been designated.

The larger divisions named in Greece are well-known geographical regions, without administrative function.

RUMANIA consists of thirty-nine counties and three cities of regional status, Bucharest, Constanța and Petroșeni. Scale does not permit delimiting these counties.

ALBANIA is divided into twenty-seven districts. Scale does not permit the delimitation of these divisions.

YUGOSLAVIA is a federation of six republics. The Serbian republic includes an autonomous province (Voyvodina), and an autonomous region (Kosovo-Mitohiyan).
